

Baby Behavior

Infant behavior has been explored and document for more than 30 years. Current education is excellent but complex and time consuming. UC Davis Lactation Center and California WIC partnered for a 3 year USDA WIC Special Projects Grant from 2006 to 2009 (copyright 2011). The outcome of that study resulted in the Baby Behavior Education training.

Topics to be covered:

- Introduction and background to Baby Behavior
- Secrets of Baby Behavior
- Infant States, Cues and Crying
- What are infant states?
- How to recognize your baby's behavioral cues
- Why babies cry?
- Infant sleep cycles
- Caregiver-infant interaction
- Tips and Tools for caregivers
